

CLEAF
BY WESTON PREMIUM WOODS

THE FUTURE OF CANADIAN LIVING

In partnership with U31 Design and Cleaf (by Weston Premium Woods), AyA Kitchens will take the traditional "tree house" to a whole new level. Our IDS18 collaboration is inspired by Toronto's culturally diverse makeup with podlike spaces depicting the residential quarters of various local archetypal characters. Exemplifying the future of Canadian living, this wintry vertical community will fascinate and delight the global architecture and design community through innovative uses of texture, height, and space.
